Test 10

Time Allowed: 3 Hours

Maximum Marks: 250

GENERAL INSTRUCTIONS

This is Question-Cum-Answer (QCA) Booklet. Immediately on receipt of the booklet, please check that this QCA booklet does not have any misprint or torn or missing pages or items, etc. If so, get it replaced by a fresh QCA booklet.

Candidates must read the instructions on this page and the following pages carefully before attempting the paper

Candidates should attempt all questions strictly in accordance with the specified instructions and in space prescribed under each question in the booklet. Any answer written outside the space allotted may not be given credit.

A Separate Question paper is given to the candidate which can be taken by the candidates after conclusion of the exam.

1. "What are Antibiotics? Why aren't Antibiotics effective against viral diseases or infections? (12 Marks)

Candidates
Must not
write on
this margin

:- Antibiotics are the immunity providers, these are protect the body against the harmful microorganisms by providing suitable response.

effective
against
viral
infections
= ?

* usually antibiotics provide resistant against harmful infections (or) diseases. but sometimes they are not effective because,

① Improper consumption of antibiotics. that is, not completed the full medication of antibiotics, it turns pathogens resistant against drugs.

② super bugs → pathogens does not respond to these drugs, because of their mutation capacities.

③ If the disease cross its initial (or) curable limits in stages.

④ weaken immune system → Body
not able to produce antibodies
against disease. (weaking immune
response from body) due to lack of nutrients,
energy etc.

⑤ some chemicals used in Food industries
~~like~~ - poultry ~~industries~~ - for increase
growth of fowls, it acts as
antireistance products. eg: calisthen.

⑥ some times drugs failed to work against
infectious if infecter is new (or) complex.

⑦ ^{time} GM - crops also make the body
weaken against
viruses made them as superbugs

All these are reason for ineffectiveness
of antibiotics. so proper care should
be taken in personal usage and
industrial development of foods ^(poultry) to
ensure safety.

2. A recent study revealed that malnutrition in children is not limited to rural Karnataka but also seen in urban areas. Summarize the reasons for malnutrition in urban areas and Suggest universal measures to eradicate Malnutrition. (12 Marks)

Candidates
Must not
write on
this margin

Malnutrition is the acute shortage of food for development i.e. proper development of Health. especially in children it poses a threats like stunting, wasting etc and inadequate anemic condition.

Recent study in Karnataka, shows that it is not limited to rural areas, but also seen in urban area, possible reason for this is,

(1) Improper penetration of public distribution system in urban areas.

(2) Lack of participation of Integrated child development schemes

(3) not able to avail benefits in PGs. because of local document requirements.

(4) working mothers - not able to take care of childrens.

(5) Increased living expenditure, short of

6. How does the National Strategic Plan (2017-24) aim at eradicating HIV/AIDS by 2030? In this context, what is the objective of Mission Sampark? (12 Marks)

Candidates
Must not
write on
this margin

~~Epidemiology~~
:- AIDS is caused by the virus
Human Immuno deficiency syndrome - it
caused by HIV virus, to eliminate
this disease government of India
carried out number of initiatives.

* National Aids control organization (NACO) has made significant contribution to this.

* National strategic plan - (2017-2024)
had made significant contribution towards
eradication of HIV,

as per recent data,

→ 80% of the HIV spreading has
stopped in India.

→ 38,000 women are infected in 2007
now it reduced to 20,000.

→ 50% reduction in mother-to-child
transmission of HIV.

What are the objectives of
National Strategic plan?

mission samprakti - (MOH & FW)

* Aims to eliminate HIV by 2030.
by suitable awareness mechanisms

* aimed to 0% transmissible of mother
to child HIV.

* giving awareness → on 1st →
AIDS Day.

* ~~Just~~ Tracking of patients
3D's model → Detect.

→ Diagnose.

→ Deduct.

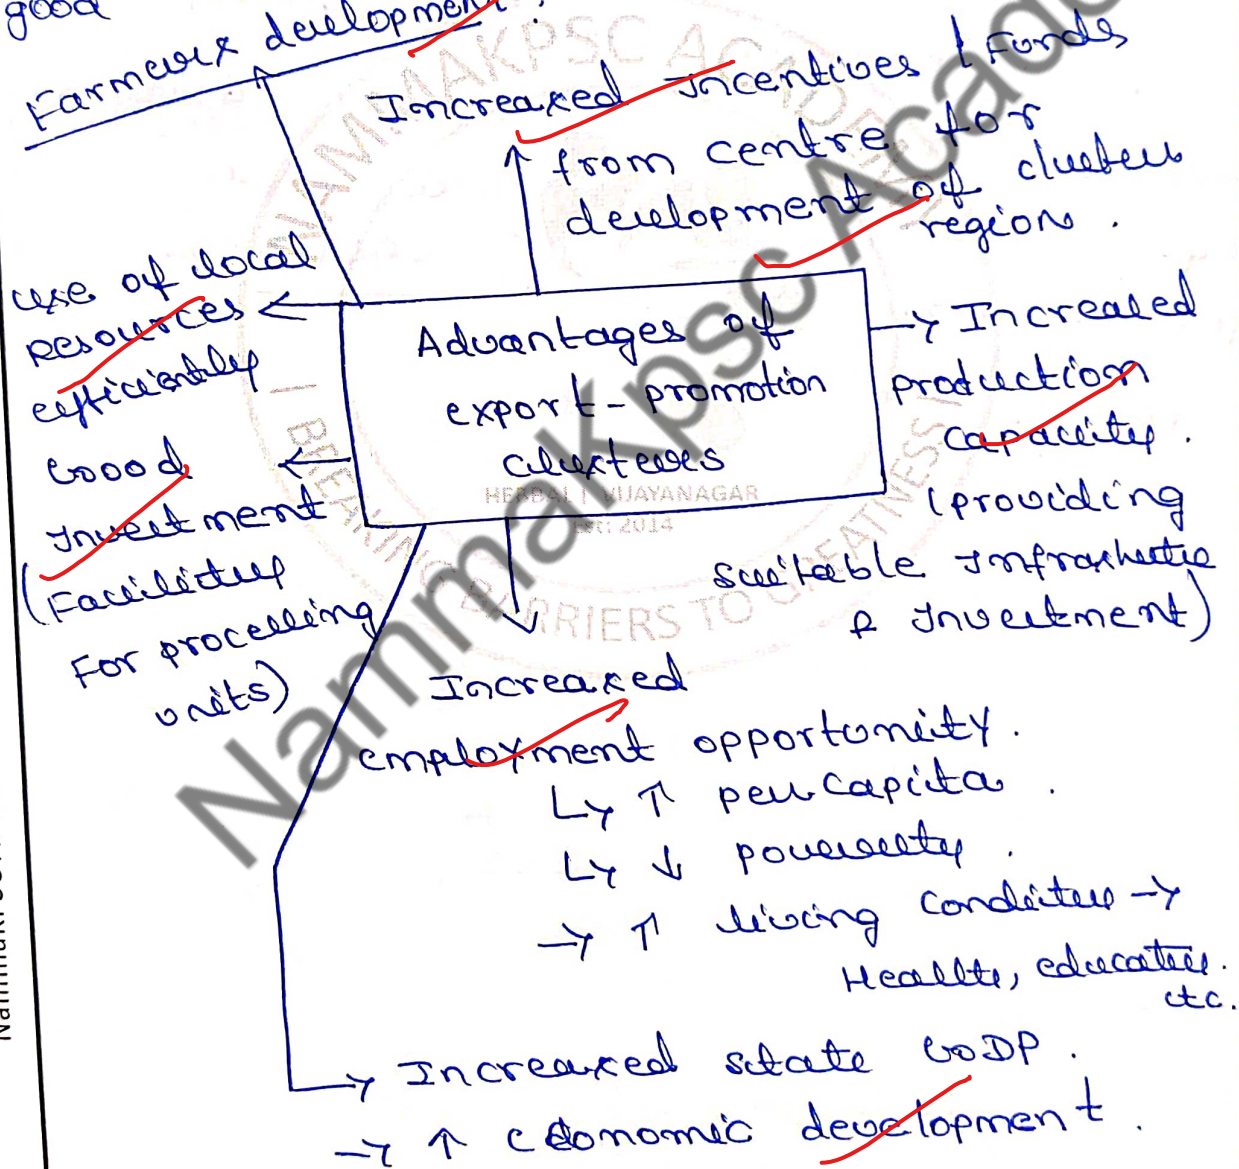

In this way it is contributing
towards ~~eliminated~~ ~~reduction~~ of HIV by
2030.

8. The government recently announced the launch of Tilhan Mission to make the country self-reliant in oilseed production. In this context, comment upon the necessity to ramp up oilseed production in the country and how this can be achieved. (12 Marks)

Candidates
Must not
write on
this margin

1- Oil seeds are one of the major essential items in our agricultural basket. India produces more quantity of oil seeds, still it imports about 20,000 tonnes of oil seeds costing 14 bn us dollars to overcome this ~~support~~ Import dependency and achieve self sufficiency. Tilhan mission is very good move

To have climate for benefit generation

Candidates
Must not
write on
this margin

How we can achieve this?

(*) Bring awareness about importance of oil seed production by suitable workshop organizing (or) via krishi vigyan kendras.

(*) Give incentives (or) subsidies to agri.-business seeds, loans for production. MSP

(*) Promotion of research and development in top agricultural universities and collaborate with academics.

(*) Use technologies for assessment and identification of potential areas for oilseed development (GIS, drones etc).

(*) Provide irrigation, fertilizers, pesticides @ subsidized prices, etc.

Govt of India provided ISOPOM mission to bring more area under oilseed production and yellow revolution deepnet mission and many programs.

In this way we can achieve the production of oilseeds by suitable methods & technologies and reduce the import charges and enhance self sufficiency.

9. It has been recently noticed that for every 100 anganwadi beneficiaries in the country, only 7 are in urban areas. This has been identified as due to lack of Anganwadi centres in urban areas which denies children in urban areas of certain benefits under ICDS. How can the ICDS program be strengthened in urban areas? (12 Marks)

Candidates
Must not
write on
this margin

:- Any ~~welfare~~ state the goal is to provide ~~Health~~ Health facilities, Food security and their entitlements (rights) providence for its citizens. The Integrated development surveillance program has the objective in this direction.

~~of~~ ~~provides~~, ICDS provides food facilities, for children and nutrients development, for pregnant and lactating mothers also supplies distribute of Ration (cereals) etc.

* But, recent survey shows 100 ~~beneficiaries~~ for ~~beneficiaries~~ ~~7 are~~ from urban areas, because of,

- (1) lower penetration of the scheme.
- (2) not aware of these facilities.
- (3) Increased private institutions.
- (4) institutional barriers.
- (5) lack of political will.

Candidates
Must not
write on
this margin

(6) diversification of facilities, corruption, mismanagement etc.

(4) people's mindset may be one of reason.
[Urban areas parents not willing to access Anganwadi services] → misinterpretation
only rural people can have access b/c of poverty and malnutrition

How we can strengthen this;

- (1) BY awareness campaigns → by local Health centres.
- (2) Advertisement in media (local channels)
- (3) Collaborate with state governments (It knows the region specific issue thoroughly)
- (4) promoting e-governance → by websites advertisement in government websites
- (5) At the time of delivery → give knowledge about ICDS to moms.
- (6) strengthening infrastructure and institutions and emphasized for behavioral change of people.

→ BY this way we can increase penetration of ICDS, it helps in Reducing child malnutrition, stunting, anemia & ↑ MMR, IMR.

Incr

10. What do you understand by Food Irradiation? What is the need for it? (12 Marks)

Candidates
Must not
write on
this margin

Food Irradiation is the process of radiating of food products for their increased shelf life and for killing of microorganisms ~~decreasing~~ by reducing their microbial activity.

→ Food wastages is the potential and major concern in India, for keeping the farmer's concern, and nutritional security and to increase the shelf life of food for trading purpose it is necessary for food conservation ~~decrease the~~ effect of microorganism. ↓ Health adverse impact.

Good Usage of Current affairs

Candidates
Must not
write on
this margin

For this to be achieved we should, have proper infrastructure and institutional mechanism. Eg:- mission sampada helps by providing food processing and supply chain management opportunities.

→ But it should be done with utmost care with expert, otherwise of Radioactive can make food poisonous & adverse.

Health Impact

The production food is huge enough but lack of storage facilities and scientific management techniques it getting shortages & creating scarcities. Solar irradiance provides advantage over this by providing increased life and from action of microbes.

Candidates
Must not
write on
this margin

Hydroponics is the technique of clearing the excess nutrients developed algae, etc, features like phumids,

16. Examine this statement: "Horticulture can increase farmers' income". (12 Marks)

Candidates
Must not
write on
this margin

:- Horticulture is the ^{cultivation} culture of Fruits, vegetables, flowers. it also part of agriculture.

Horticulture has the potential to increase the income of farmers, it gives promised prices for the Horticultural products. itself by provides nutritional security, and helps in reducing poverty.

The GOI goal of Increase/doubling the farmers income, Horticulture is the one of the potential critical area. as it provides diversified from traditional crops.

* Increased Commercial Income.
* There is a large demand for Horticultural product outside the country also. India is II largest exporters of vegetables, and Fruits in the world. Eg:- UK, oman, UAE, Nepal, are major importers.

* It provides agricultural diversification, 14. lakh hectare has increased under Horticulture. * as used in medicine, cosmetics etc. new increased value

* BY well improvement of supply-chain and processing and value additional technology for Horticulture products we can utilize the Horticultural potential for development of economy

* Food processing sectors also provides huge employment opportunities it also increase income of people.

In this decentralized GOI has taken number of development initiatives,

① MIDH → mission for integrated development of Horticulture.

② value addition process through SAMPADA umbrella scheme

③ development of research and well infrastructure facilities.

④ Hop CONS work Initiatives, *KEYC micro irrigation facilities.

⑤ Horticultural universities - Bangalore, new Bagalkote.

⑥ training and research workshops etc.

In this way to achieve the dream of doubling the farmer income by 2022, Horticulture is the one potential field we can utilize.

17. Examine the potential and scope of fisheries sector in India. Discuss the challenges of Fisheries sectors and measures to address the same. (12 Marks)

Candidates
Must not
write on
this margin

:- India having the coastal area of almost 7500 km of coastlines and different climatic regions, it provides potential area for Fishing.

Fishing is one of the activities under agriculture. catching, rearing, and cultivation of fishes for food purposes as well as commercial usage.

challenges: - (*) **Traditional methods of Fishing**. not able to provide much income
 eg: Norway $\rightarrow 250 \text{ kg/day}$ per fisherman.
 India $\rightarrow 5 \text{ kg/day}$ $\rightarrow 1 \text{ person}$.

(*) not having ^{good} value addition infrastructure (limited), cold storage, processing unit etc.
(*) Lack of Research and Innovation for updated development

(*) Investment barriers, (*) environmental limitations (*) limited varieties of fishes
(*) with outdated mechanized vehicle not able to catch Tuna like high value fishes.

To overcome these challenges, govt of India, had taken measures;

① FIDF → Fisheries Infrastructure Development Fund.

(*) Cold storage facilities.

(3) mission samagra for fishes ²⁰⁶⁰⁰ allocation.

(4) Fishermen development schemes.

(5) Blue Revolution → New Fisheries Policy (2020)

(6) Matsya Sampada Yojana

Government of Karnataka → Matsya Ashraya Yojana

→ 50 thousand for women involving in fisheries for two wheeler purchase
→ New research instit etc at Kundali etc.

(*) Blue revolution is the optimal way for India to harness the income & potential, to ↑ farmers income (by 2022) by applying sustainable fishing practices and modern equipments.

20. Despite being fully curable, India still has the highest TB burden in the world with people still dying from it. Suggest certain measures to help eradicate TB. (12 Marks)

Candidates
Must not
write on
this margin

Tuberculosis is a bacterial disease caused from mycobacterium tuberculosis.

TB is fully curable disease, with drugs and food supplements. India had made notable footprint in eradication of TB & achieved considerable reduction. although still it has highest burden.

* Lack of people involvement
↳ people not coming forward to take treatment

Not using facilities like drugs, bedaquiline etc.

Reason for still prevalence of TB

Highest diabetic patient → more vulnerable.

* malnutrition
* poverty
* poor awareness

HIV persons
↳ vulnerable to TB
↳ death in most cases.

India made number of initiatives to tackle this, what we need is full reachment of this initiatives to Beneficiaries,

→ Detect - Test - cure → Fully covered by random testing via panchayats.

→ Nikshay platform → made voluntary enrolment.

→ community participative → most important made people to take facilities → di'be distributed of free medicine & treatment in district Hospitals. etc.

→ enrich ^{nutrients} & made food security to all.

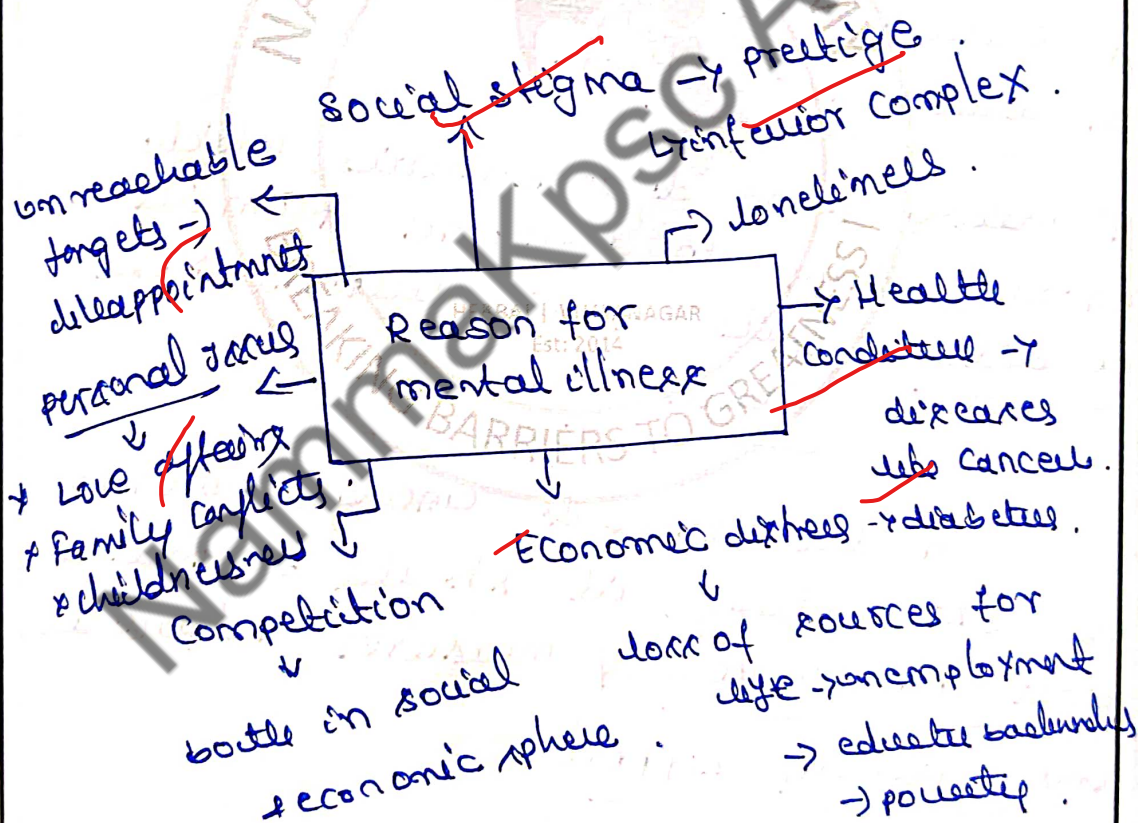

→ people participation also plays crucial role in any project success, until & unless people come forward take advantage of govt facilities and services. It become unrealized dream to achieved reality.

21. Mental illness has become a serious concern in India.
How can this crisis be tackled? (10 Marks)

Candidates
Must not
write on
this margin

Illness is the state of discomfort in body (or) in mind.
mental illness is the emerging and serious concern in India. it should be handled very effectively otherwise it leads to more loss of human capital.

How it can be tackled:-

① BY Suitable supports -> counseling
with experts.

* By providing mitigating opportunities,
↳ providing employments, ↓ poverty.

(*) security supports and psychological
centres → mental Health care clinics,
→ Free counselling in district health
hospitals. Eg: govt passed National
mental Health care bill

(*) awareness generation → through media,
News papers etc.

(*) Inclusion of mental Health subjects
in academic syllabus.

(*) making some documentaries, which
enriches them to overcome from ill
conditions like → life lessons, yoga
classes etc.

mental illness is emerging illness
of 21st centuries, it should be treated
with proper policy measures, and personal
and family support.

Some measures
